7. STOCK-BASED COMPENSATION

The Board of Directors has adopted and approved a share option plan for the directors, officers, consultants and key employees and affiliates of the Company. The share option plan was approved by the shareholders of the Company on June 15, 2001 and amended on September 15, 2016.

Each employee share option converts into one ordinary share of the Company on exercise. No amounts are paid or payable by the recipient on receipt of the option. The options carry neither rights to dividends nor voting rights. Options may be exercised at any time from the date of vesting to the date of their expiry.

The Board grants share options from time to time based on its assessment of the appropriateness of doing so in light of the long-term strategic objectives of the Company, its current stage of development, the need to retain or attract particular key personnel, the number of share options already outstanding and overall market conditions.

The share options outstanding and exercisable at September 30, 2016 are as follows:

	Number	**Exercise price(1)**
Balance at beginning of the year	**880,500**	**$1.35**

8. CAPITAL MANAGEMENT

The Company's objectives when managing capital are to:

- Deploy capital to provide an appropriate return on investment to its shareholders;
- Maintain financial flexibility in order to preserve the Company's ability to meet financial obligations; and
- Maintain a capital structure that provides financial flexibility to execute on strategic opportunities.

The Company's strategy is formulated to maintain a flexible capital structure consistent with the objectives as stated above and to respond to changes in economic conditions and the risk characteristics of the underlying assets. The Board of Directors does not establish quantitative return on capital criteria for management, but rather promotes year-over-year sustainable profitable growth. The Company is not subject to any externally imposed capital requirements other than the financial tests and covenants associated with its credit facilities as described in note 9. At September 30, 2016, Questor was in compliance with these covenants.

The Company's capital structure consists of equity and cash. In order to maintain or alter the capital structure, the Company may adjust capital spending, refinance existing credit facilities, raise new debt and issue common shares. It is expected, however, that Questor's funds generated from operations and cash amounts will provide sufficient capital resources and liquidity to fund existing operations in 2016 and anticipated capital expenditures.

A key measure the Company utilizes in evaluating its capital structure is the ratio of debt-to-total capitalization. Debt-to-total capitalization is calculated as debt divided by total capitalization. Debt is defined as total short- and long-term borrowings unadjusted for cash balances. Equity is defined as capital and reserves attributable to equity holders. Total capitalization is defined as the sum of debt unadjusted for cash balances and the book value of equity.

The debt-to-total capitalization ratio was as follows:

As at September 30, 2016	
Short-term borrowings	**$ -**
Long-term borrowings	-
Debt	**-**
Equity	**14,463,611**
Total capitalization	**$14,463,611**
Debt-to-total capitalization ratio	**0.00%**

9. SHORT-TERM BORROWINGS

The Company has available a revolving demand operating loan to a maximum of $560,000, the availability of which is subject to specified margin requirements. The revolving demand operating loan bears interest at bank prime plus 1 percent per annum. The Company has provided a general security agreement and an assignment of insurance proceeds as security. Up to $100,000 of this loan is available to secure the issue of letters of credit and/or letters of guarantee for suppliers. No amounts have been drawn on this facility at September 30, 2016.

The Company has a demand revolving foreign exchange facility established to a maximum of USD 250,000 to purchase foreign forward exchange contracts in order to hedge against currency fluctuations. This facility is secured by a general security agreement and an assignment of insurance proceeds. The availability of this facility is also subject to the Company meeting certain financial covenants. No amounts have been drawn on this facility.

All of the borrowing facilities have financial tests and other covenants customary for these types of facilities. At the end of each fiscal quarter the Company's debt-to-tangible-net-worth must be less than 2.5 and the Company's working capital ratio must be greater than 1.25. At the end of each fiscal year, Questor's debt service coverage ratio must be in excess of 1.25.

10. FINANCIAL INSTRUMENTS

The Company's financial instruments consist, from time to time, of cash and cash equivalents, short-term investments, trade and other receivables, short-term and long-term borrowings and trade payables, accrued liabilities and provisions. The carrying amounts of the current financial assets and current financial liabilities recognized in the Company's consolidated financial statements at the end of each reporting period approximate their fair value due to their short period to maturity. At September 30, 2016, there were no investments, short-term or long-term borrowings outstanding. The Company did not hold or issue any derivative financial instruments during the period.

16. COMMITMENTS

The Company's commitments are described in Note 25 to its audited consolidated financial statements as at and for the year ended December 31, 2015. Management has not entered into any new commitments during the three month and nine month period ended September 30, 2016.

17. RELATED PARTY TRANSACTIONS

In the normal course of business, the Company may transact with related parties. There are no related party transactions during the three month and nine month period ended September 30, 2016 and 2015.

18. SEASONALITY AND CYCLICALITY OF OPERATIONS

There are a number of factors contributing to quarterly variations that may not be reflective of the Company's future performance. A significant portion of the Company's operations are carried on in Western Canada where activity levels in the oilfield services industry are subject to a degree of seasonality due to volatility in the weather and temperatures. Oilfield services demand is driven by customer capital spending and drilling programs which are affected by oil and natural gas commodity prices, changes in legislation and seasonal behaviours. Other factors causing variation include the Company's mix of products and services delivered, and the currency in which the sales are transacted.

19. CONTINGENCIES

From time to time, the Company is subject to costs and other effects of legal proceedings, settlements, investigations, claims and actions. The Company determines whether an estimated loss from a contingency should be accrued by assessing whether a loss is deemed probable and can be reasonably estimated. The Company develops its views on estimated losses in consultation with outside counsel handling our defense in these matters.

Notwithstanding the uncertainty as to the final outcome, based on the information currently available to it, the Company does not currently believe these matters in aggregate will have a material adverse effect on its consolidated financial position.
