

Mechanical and/or Chemical Engineer

Questor Technology Inc. (“Questor” or the “Company”) is a dynamic and rapidly growing international environmental oil field service company that is seeking a **Mechanical and/or Chemical Engineer** who has knowledge of combustion, manufacturing, power cogeneration, heat recovery, environmental dispersion and sulphur recovery emission capture. The opportunities are technical, diverse and rewarding.

The ideal candidate will be responsible for the following:

- Oversight of international projects and working with Field Operations to ensure safe and successful delivery, construction and operation;
- Involvement with the design of new incinerators, including all ancillary equipment (fuel train, inlet headers, air inlet, interface with PLCs, air arrestor placement and nozzle orientation);
- Lead in design of heat recovery and power generation projects;
- Provision of dispersion modeling feedback to clients;
- Writing of technical papers relating to combustion, greenhouse gas reduction, power generation, heat recovery and sulphur recovery;
- Sizing of incinerators based on technical information provided by the clients; and
- Provision of innovative engineering solutions to operating and maintenance issues.

Qualifications and Education

- Mechanical / chemical petroleum or environmental engineering disciplines with design experience;
- Excellent interpersonal and written communication skills and networking ability;
- Strong technical background and business acumen with the ability to drive short-term and long-term technical solutions;
- Knowledge of applicable industry codes and standards;
- Excellent analytical and problem solving skills;
- Ability to apply engineering principles, codes and standards to identify issues, recommend improvements and implement solutions; and
- Ability to recognize and adapt to changing business priorities

Knowledge of computer assisted drafting or drawing programs would also be an asset.

Application Process

Qualified applicants are invited to deliver or e-mail their resumes in confidence to the Company.

About the Company

Questor is an international environmental oil field service company founded in 1994 and headquartered in Calgary, Alberta, Canada with a field office located in Grande Prairie, Alberta, Canada. The Company is focused on clean air technologies with activities in Canada, the United States, Europe and Asia. Questor designs and manufactures high efficiency waste gas incinerators and also provides field burner services. While the Company’s current client base is primarily in the oil and gas industry, this technology is applicable to other industries such as water and sewage treatment, landfills, tire recycling and agriculture.
