### Solution Design

We will tailor a solution to  
your project

### Installation

Our qualified field team will  
have your solution up and  
running within a day

### Support

We offer 24/7 support

## Meet ESG Standards and Get Your Project Operational

Don't let regulation hold you back. For over 25 years, Questor has been exceeding emissions regulations standards. We have thousands of installations and our patented technology is ISO 14034 certified and guarantees 99.99% emissions reduction. We are the only clean combustion technology company with this international recognition, and we bring that guarantee to every project.

## Reduce, Reuse, and Power

Our product lineup features the most innovative and effective gas combustion technology when paired with a generator that can take the waste heat and convert it into electrical power. This solution streamlines your overall system and creates opportunity for valuable energy savings.

## Achieve Your Project Objectives

- ✓ Exceed regulation emission standards
- ✓ Meet corporate ESG initiatives
- ✓ Happy neighbouring communities
- ✓ Quick installation - in 10 minutes with our customized patented trailer
- ✓ Reliable with a performance guarantee
- ✓ Minimal on-going maintenance
- ✓ Cost effective
- ✓ Rent or buy options

# Key Solution Benefits

## 99.99% Emissions Reduction Guaranteed

Our patented technology is the only solution on the market guaranteed to reduce emissions by 99.99%. We are also the only company with ISO 14034 certification for our clean combustion technology.

## Quick and Easy Installation

Our patented trailer can set up a unit in 10 minutes without a pickup or crane.

## No Adjustments or Complicated Controls

As flows and compositions change, our technology automatically adjusts without manual assistance or interference.

## Minimal Maintenance and Downtime

Our simple design doesn't involve any moving parts. Meaning no parts to replace or repair.

## No Additional Equipment Needed

Our solutions don't require blowers or additional equipment to operate.

## No Expensive Control Units

There are no complicated control panels. We can monitor all activity through our cloud-based technology.

## No Training

Once our solution is installed it does not require anyone to operate it. We pride ourselves on our "set it and forget" design. We have units that have been operating in the field for over 15 years without interruption.

## Power Generation

Our product line includes a power generation option that allows you to turn the waste heat into power that could be stored, used, or sold back to the grid.

## Health & Safety

Your team, your neighbours and your community will enjoy clean air everyday they walk on site. No dark clouds or irritating odours that can cause discomforts.
