Questor

Waste Gas Thermal Oxidizer

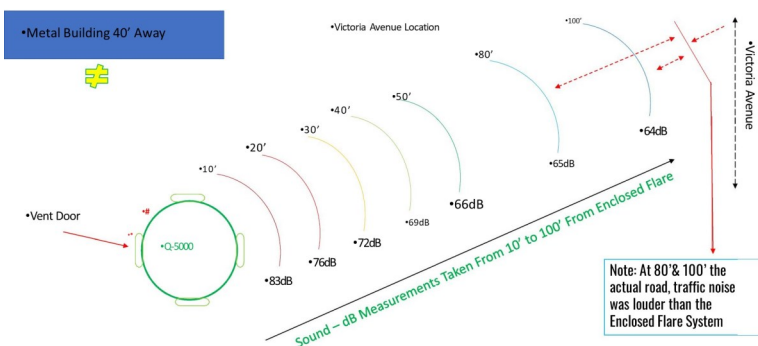

NO VISIBLE FLAME, SMOKE OR ODORS

INTELLIGENT DESIGN

- ⇒ Exceeding 99.99% combustion efficiency for complete destruction of harmful pollutants.
- ⇒ Manage both high and low pressure streams (2 oz. to 30 psi) within a single device.
- ⇒ Natural draw process design; no fans or blowers are required.
- ⇒ Small footprint

LOW NOISE OPERATION

Specialized Trailer Transport

- Compact and lightweight for ease of portability
- Setup or takedown in less than 10 minutes
- Eliminates crane and pickup costs
- Detachable trailer; Minimal footprint

MINIMAL GROUND LEVEL HEAT RADIATION

- Low forest fire risk
- Permafrost protection
- Air intakes can be flash arrested
- No need for water curtain

Rental Applications

Well Testing & Flowback
Alberta, Canada

Early Production Facility
Colorado, United States

Pipeline Blowdown & Maintenance
California, United States

Community Acceptance
Colorado, United States

Ideal Solution for Non-Routine & Maintenance Work:

⇒ Well & tight-hole tests
⇒ Production tests

⇒ Plant turnarounds
⇒ Pipeline blowdowns

⇒ Coalbed methane tests
⇒ Early production facilities

A Wide Range Of Sizes!

	Q250	Q500	Q3000	Q5000
Capacity* MSCF/day	5 - 50	50 - 500	300 - 3000	500 - 5000

* Based on natural gas (0.6 kg/m³)

Please Note: Table information is for illustrative and approximate sizing purpose only. Actual gas capacity will depend on the type of gas burned and available pressure. Questor custom designs combustors to meet multiple end use applications.
